WHO MIGHT NEED HEALTH CARE?
Home Care is suitable for persons of all ages with all kinds of needs. Typical home care clients include:

An individual who has recently been discharged from the hospital and is not fully recovered.

A person with a chronic condition that needs frequent monitoring, such as diabetes, kidney disease, stroke, heart/lung disease, or multiple sclerosis.

An individual with cancer, who needs a program of pain management, emotional support, and personal care.

Someone with limited mobility, such as a stroke or fracture victim, or an elderly person who needs help with activities of daily living.

An employed adult receiving intravenous antibiotic therapy at home rather than in the hospital.

TOP CARE HOME HEALTH SERVICES
